- (A) Lesson plan
 - (B) Mode of presentation
 - (C) Prescriptive strategy for teaching
 - (D) Skill of teaching
52. Programmed learning is based on the principle of —
- (A) Conditioned Learning Theory
 - ☒ (B) Cognitive Learning Theory
 - (C) Gestalt Learning Theory
 - (D) Operant Conditioning
53. Which of the following is not correctly matched ?
- (A) Achievement Test – Content validity
 - (B) Aptitude Test – Predictive validity
 - (C) Reasoning Test – Content validity
 - (D) Personality test – Concurrent validity
54. Absolute zero is a characteristic of —
- (A) Nominal level of measurement
 - (B) Ordinal level of measurement
 - (C) Interval level of measurement
 - ☒ (D) Ratio level of measurement

55. Two variables X and Y are correlated. This means that the two variables
- (A) cause variation in each other
 - (B) measure the same trait
 - (C) vary independently
 - (D) vary together
56. My height is 5 feet 8 inches. The level of measurement associated with this example is
- (A) Nominal level of measurement
 - (B) Ordinal level of measurement
 - (C) Interval level of measurement
 - (D) Ratio level of measurement
57. Which of the levels of measurement does not possess the property of magnitude ?
- (A) Nominal level of measurement
 - (B) Ordinal level of measurement
 - (C) Interval level of measurement
 - (D) Ratio level of measurement
58. Which one of the following statements is incorrect regarding the reliability of a test ?
- (A) Reliability is self correlation of a test
 - (B) Reliability is the consistency of the scores obtained in a test
 - (C) Reliability is the correlation with the outside criterions
 - (D) Reliability can be measured
59. Objectivity of a test refers to
- (A) scoring and interpreting items that do not depend on the evaluator
 - (B) consistency of the scores in a number of administrations
 - (C) giving more and more objective type questions in the test
 - (D) having objective based questions in the test
60. What does comprehensive evaluation of a student mean ?
- (A) Achievement in academic subjects
 - (B) Overall achievement in overall performance in the classroom
 - (C) Teaching the student how to improve communication skills
 - (D) Both (A) & (C)

61. A standardized test of achievement yields scores between 200 and 600. If you are to create a frequency distribution of the scores, what would be the most appropriate width for the class interval ?
- (A) 10 (B) 20
(C) 50 (D) 100
62. Which of the following is a discrete variable ?
- (A) The amount of time remaining on this exam
(B) The number of questions on this exam
(C) The width of the paper that this exam is printed on
(D) All of the above
63. Which of the following tools of collecting psychological information about pupils is the most objective ?
- (A) Rating scale (B) Interview
(C) Standardized test (D) Projective devices
64. A conflict implies
- (A) disorganisation of behaviour
(B) incompetence
(C) incomparability in motives and for goals
(D) insecurity in feeling
65. "Grapes are sour" is an example of —
- (A) Sublimation (B) Projection
(C) Compensation (D) Rationalization
66. The child who reads numbers wrongly has the following learning disability—
- (A) Dyscrasia (B) Dyslexia
(C) Dyscalculia (D) None of these
67. Which of the following is not a defense mechanism ?
- (A) Regression (B) Association
(C) Compensation (D) Sublimation

68. A student wants to know whether he will perform well in a particular job. Which one of the following tools will predict this ?
- (A) Aptitude test (B) Attitude test
(C) Interest test (D) Personality test
69. Among the following Psychologists, who constructed the first Intelligence test ?
- (A) William James (B) J. B. Watson
(C) William Mc Dougal (D) Alfred Binet
70. Optimism has been associated with all of the following except ...
- (A) taking care of one's health
(B) increased rates of learned helplessness
(C) lower rates of depression
(D) healthy immune system
71. One of the founders of Humanism is ...
- (A) Karen Horney (B) Erik Erikson
(C) Alfred Adler (D) Carl Rogers
72. Projective tests claim to reveal information about ...
- (A) career aptitude (B) intellectual attainment
(C) unconscious processes (D) parenting style
73. Who suggested that mental processes and events are unimportant or even totally non-existent ?
- (A) Jung (B) Watson
(C) Wundt (D) Hull
74. General Psychology and Educational Psychology are dissimilar, in that Educational Psychology —
- (A) is concerned with the child and not with the adult.
(B) is concerned with the various aspects of learning.
(C) deals only with the applications and not with the theory.
(D) selects and emphasizes certain data from the general field.

75. According to the Guilford's (1967) model of Intelligence, the number of identifiable abilities are —
 (A) 120 (B) 110
 (C) 100 (D) 130
76. The Hunter Commission of 1882 resulted in the :
 (A) founding of several Indian Universities
 (B) abolition of child marriage
 (C) introduction of the postal system
 (D) introduction of Payment by Result system.
77. The structure of School Education as recommended by NEP 2020 is
 (A) 5+3+3+4 (B) 3+5+3+4
 (C) 4+5+3+3 (D) 3+3+4+5
78. NEP, 2020 targeted to achieve universal foundational literacy and numeracy in primary school by
 (A) 2025 (B) 2030
 (C) 2040 (D) 2035
79. Which of the statements are correct regarding Micro teaching ?
 I. Micro teaching is a teacher training technique
 II. It develops the teaching skills among the teacher
 III. Only because of its small class size it is called micro teaching
 IV. In Micro teaching Feedback of observer is not very significant for the teacher.
 Choose the correct option —
 (A) II, III, & IV only (B) I, II & IV only
 (C) I & II only (D) III & IV only
80. Which of the following statements is incorrect about the use of teaching aids ?
 (A) They help the students to be engaged in the teaching
 (B) They help students to be attentive in teaching
 (C) They enhance rote learning
 (D) They enhance learners, performance.

- (A) Development of democratic citizen.
 - (B) Improvement of vocational efficiency
 - (C) Development of leadership
 - (D) Encouragement of regionalism.
83. Operation Black-Board (1986) Programme was introduced to improve
- (A) Teacher Education
 - (B) Primary Education
 - (C) Secondary Education
 - (D) Higher Education
84. Match the methods of Comparative Education with its inherent meaning :
- | | |
|-----------------|---|
| a. Descriptive | (i) description of educational system of foreign countries |
| b. Historical | (ii) looked deep into history |
| c. Quantitative | (iii) based on statistical data for comparison |
| d. Scientific | (iv) compare educational values by administering various test to students in different countries. |
| | (v) eliminate subjectivity and offer objective observation |
- Codes :**
- | | | | |
|-----|-------|-------|-------|
| (a) | (b) | (c) | (d) |
| (i) | (ii) | (iii) | (v) |
| (i) | (iii) | (v) | (iv) |
| (v) | (iv) | (i) | (ii) |
| (i) | (v) | (ii) | (iii) |

85. In which of the countries listed below, does educational administration of the school exclusively rest in the hands of local authorities ?

(A) U.S.A.

(B) U.K.

(C) India

(D) Japan

86. Institutions of Higher Education in Japan are known in Japanese language as —

Institutions

Japanese language

a. Universities

(i) Tanki-Daigaku

b. Junior College

(ii) Daigaku

c. College of Technology

(iii) Koto-senmon-gakko

d. Special Training Schools

(iv) Senshu-gakko

Codes : (a) (b) (c) (d)

(A) (ii) (iii) (iv) (i)

(B) (ii) (i) (iii) (iv)

(C) (iii) (iv) (i) (ii)

(D) (iv) (i) (ii) (iii)

87. A distribution is said to be 'Negatively Skewed', when —

(A) The median is greater than the mean.

(B) The mean is greater than the median.

(C) The scores are massed at the low end of the scale.

(D) $3 \text{ Mean} - 2 \text{ Median} = \text{Mode}$

88. For normal distribution, the value of 'Kurtosis' is —

(A) 0.236

(B) 0.263

(C) 0.326

(D) 0

89. If a student gives an incomplete or partially correct response to a question, the teacher should —

(A) seek further information

(B) redirect the question

(C) refocus the question in a novel situation

(D) try to increase critical awareness

90. The process through which one communicates with himself / herself is termed as —

(A) inter-personal communication

☒ (B) intra-personal communication

(C) face-to-face communication

(D) mass communication

91. Teaching poetry in Class VI is an example of a/an —

(A) Knowledge lesson

(B) Skill lesson

☒ (C) Appreciation lesson

(D) Application lesson

92. The index of difficulty of an item of a test is 90. The item is —

(A) very difficult

(B) very easy

(C) average difficulty

(D) data not sufficient

93. Which of the following is not an example of measurement ?

(A) The Quarter No. of Mr. Kalita is 68.

(B) Ravi scored 60 in English.

(C) IQ of Irine is 130.

☒ (D) Virat Kohli is an excellent cricket player.

94. 'Oculesics' is related with —

(A) body movement and body contact

(B) voice modulation

(C) eye contact and eye movement

(D) touch

95. The number of items in the Stanford Revision of Binet-Simon Intelligence Scale, 1916 is

(A) 30

(B) 54

(C) 90

(D) 129

96. The typical score on a particular test made by a specified population is called

(A) Reliability

(B) Norm

(C) Validity

(D) Objectivity

97. 'Payment by Results' system was introduced by

(A) William Adams

(B) Lord Macaulay

(C) Lord Ripon

(D) Sir William Hunter

98. The Rorschach Inkblot Test consists of —

(A) thirty cards with bisymmetrical inkblots

(B) thirty cards with bisymmetrical inkblots and one blank card

(C) ten cards with bisymmetrical inkblots

(D) ten cards with bisymmetrical inkblots and one blank card

99. A weighing machine always measures an article of 1 kg to be 1050 grams. The weighing machine is —

(A) Neither Reliable and nor Valid

(B) Reliable as well as Valid

(C) Valid but not Reliable

(D) Reliable but not Valid

100. In a normal probability distribution, the percentage of area included between the mean and $+2\sigma$ is

(A) 34.13

(B) 47.72

(C) 68.26

(D) 95.44

—x—
